PAAVAI COLLEGE OF ENGINEERING

Dear Parents and Students!
Warm Greetings from Paavai Chairman!

" All the experience are not building blocks

They are only a foundation for the building"

At the outset, I wish to state that I am immensely happy to send you the newsletter for the academic year 2015-16. I am sure, as you look through the pages of this newsletter, you will be pleased to note that this year is also filled with a string of events at the curricular, co curricular and extracurricular levels. The intention of organizing students-centric programmes both within and beyond the curriculum and classrooms is to enable the potential engineering employees to realize that there is no end to learning. As one grows, the boundaries of knowledge and skills keep expanding.

It is found in the records of "New Skills At Work India" (NSAW) that, India's 3E challenge is Education, Employability and Employment. It means that there is a wide gap between knowledge and application of knowledge and therefore the loopholes need to be addressed immediately, for otherwise, the work environment and productivity will be affected beyond measures. Having understood the magnitude of this "skilling challenge", every year, Paavai institutions encourage both the academia and the industry to fruitfully interact through a series of learning programmes where the students, the major stakeholders of education, get directly benefitted. Once the gap between theory and practice is bridged, I am sure, every learner will experience the truth that engineering is not just about "fixing things". It is about understanding "how" and why" things work for the betterment of the society, the nation and the whole world.

The application of engineering is such that "hot sectors" like green power, single board computer, information highway, cyber security, robotics, metro rails, rocketeering, 3 D printing, nuclear sector, medical engineering and healthcare technologies offer a lot of work opportunities for engineers who are good at creating, inventing, building, designing, supervising, managing, decision making, team playing, problem solving and leading men, materials and methods involved in the process. As beneficiaries of this newsletter, I am confident that you will come to realize that every programme hosted at Paavai has an objective and an outcome and our foremost emphasis is deployment of employable skills which include a sound domain knowledge, communicative competence, workplace expertise and above all moral values. At this juncture, I am happy to share with you that the sports students of Paavai Institutions are turning every stone into a mile stone as a result of which they have secured the status of "Champion of Champions" for the year 2015.

Similarly, students from MCA, ECE, IT and CSE have won "Students Innovator Award" by ICTACT and the "Most Valuable Persons Award" in the contests held in their respective fields. Paavai has empowered learners to take responsibility for their own learning in order that they will be recognized at the global level. C.Sugavin of Computer Science department has stood world No. 1 in the Google developer's contest. The mobile app that he has developed has earned him the reputation of being the "Google Chief Student Developer". Instead of job seekers, our learners have been encouraged to become job providers. Similar to the academic program, the most coveted students-oriented culturals titled "Astra 15" had leveraged the potentials in the participants and helped them understand that creative skills are equally essential.

To conclude, let us remember that the best is yet to come. What is lost is not important but what is left is most important. Henceforth, create and seize opportunities to lead a worthy life. My Best Wishes to all my fellow academicians and students.
