PROGRAM REPORT

M. BALAJI Interacted with our 3rd year students on 3.9.2019 at Pragati hall

The Department of Automobile Engineering organized an alumni guest lecture program titled “Importance of Manufacturing Quality. The keynote address was given by the guest speaker, M. Balaji, Junior Engineer at MADRAS ENGINEERING INDUSTRIES, CHENNAI. He began the session with a definition of quality and its importance, explained quality principles, the system of quality, and the failure of quality. He also provided brief information about document handling in Manufacturing Quality. Furthermore, he encouraged students to participate in plant training and instructed them to gain practical knowledge. He conveyed positivity and motivated all the students to work toward their goals.

Emphasizing manufacturing quality ensures that products are reliable, durable, and perform as intended, reducing the likelihood of failures and defects. High-quality products lead to increased customer satisfaction, loyalty, and retention, ultimately driving business success. A focus on manufacturing quality can help a business differentiate itself from competitors by attracting customers seeking reliable products. Implementing quality control measures minimizes rework, scrap, and waste, resulting in cost savings and efficiency gains
